Switch on the Sun!

Les Pavillions

Enhance the enjoyment of your Pavilion with this combined heating and lighting unit. If it turns a little chilly during the evening then with your remote control you can enjoy warmth and.....

Switch on the Sun!

Burda of Germany manufacture this combined lighting and heating unit to the highest standard of quality, weatherproof to protection class IP65. The unit comes with everything your electrician needs to fit and connect it to your mains electricity.

The unit uses infrared short-wave technology to provide 2.1Kw of instant, comfortable, radiant heat that passes through the air without heating it. Consequently, the unit is very cost effective as

heat is not lost through draughts or hot air rising. You can turn the heat on or off and set it to three different levels using the remote control supplied.

You can turn the lighting units on or off and vary the light level using the dimmer switch supplied and mounted on the control box. If required, you can turn the lights through 180° to highlight or give indirect light to the area.

Installed Heating and Lighting Unit

Lighting Control Box with integral Dimmer Switch

Heating Remote Control

Lights may be rotated 180°
